## Flexible and Versatile New (RCC) Roller Compacted Concrete Horizontal Mixer

- Largest portable RCC mixer on market
- An inexpensive alternative to twin shaft mixers
- 8 cubic yard yield for RCC and CTB mixes
- 10 cubic yard yield with 1/2" slump and above
- Versatile - Can mix high and low slump, slurry mixes, cement treated base and roller compacted concrete
- PMMD performance rated for 30 second mix time in 4" - 6" slump for general use and 4" slump or less paving mix
- Provides exceptional operational flexibility in current heavy construction materials markets
- Proven in the market on all types of jobs: hydroelectric dams, airport runways, mainline paving, commercial buildings, bridges and all general construction concrete
- Mixer can charge all types of trucks including front discharge mixers, boost-a-load mixers, conventional mixers, agitators and any size dump trucks (portable concrete wetbelt for additional height and high speed discharge into any truck)
- Standard mixes theoretical rating of 400 cubic yards per hour - RCC and CTB mixes at 320 yards per hour (30 second mix time)
